# ALTERNATE SHADE SPECIFICATION

## Critical Bulb-to-shade Spacing for Open Top / Open Bottom Shades

For your safety, follow the dimensions shown in the chart below.

### \*\*WARNING\*\*

The recommended shades shown on the back of this lamp package are properly sized for use with this lamp. If an **Alternate Shade** is used, measurements must be checked according to the specifications below. Caution: Using an oversized shade may cause fixture to easily tip over.

AT NO TIME SHOULD THE \* CYLINDER DIAMETER (CD) AND \*\*CRITICAL RADIUS (R) MEASUREMENTS OF YOUR ALTERNATE SHADE BE LESS THAN THE MEASUREMENTS NOTED BELOW, AS THIS MAY CAUSE A FIRE HAZARD

Lamp holder base size	Bulb		*(CD) Cylinder Diameter		**(R) Critical Radius		(H) Lamp centerline length		
	Wattage	Type	Inches	(mm)	Inches	(mm)	Inches	(mm)	
	Medium	25W	A	3	(76.2)	1-5/8	(41.3)	2-3/4	(69.8)

### Terminology

#### \*CD= Cylinder Diameter

The minimum diameter of a cylinder, as determined by the bulb wattage in the Chart, which must be able to pass through the openings in the top and bottom of the shade.

#### \*\*r = Critical Radius

The critical radius is the minimum allowable horizontal distance from the center point of the bulb filament to either side of the shade (see diagram).

### Installation of Leveling Kit:

After you have fully assembled your lamp and find out that it is leaning toward a certain angle, you can level it using these simple steps:

1. Peel off adhesive on the round cushion, and attach it on the area that wobbles or needs added height.
2. Depending on how high or low you want the lamp leveled, you can stack the cushion pads together to achieve required balance.
